Kubernetes & Docker

Project Management

Fullstack Development

CI/CD Automation

Data Analyzing and Management

Academic Projects

Study Bridge - Student Migration Management System (Web Application)
System which can be used to openly find details and communicate for students and universities. Consists of 8 management systems. As the Team Lead I managed the project updates by using a Kanban board and completed the examination management system.
Tech Stack - Mongo DB, Express, React, Node js

Mailmind - AI Powered Mail Management System
MailMind is an AI-powered email management platform that boosts productivity by helping users categorize, summarize, and organize their emails efficiently. Built with modern technologies, MailMind offers intelligent automation features to streamline your inbox workflow. As a member I contributed in Project management and UI/UX development with Frontend.
Tech Stack
Frontend : NextJS, ShadCN UI, Tailwind CSS
Backend : MongoDB, Clerk, Aurinco, Orama, Stripe

Happy Pool - Mobile Game
Game from the top view where you have to run by changing lanes one by one as you see obstacles ahead.
Tech Stack: Kotlin, XML (Android Studio)

Personal Projects

Anime Recommendation System - Web Application
Recommends anime according to your watchlist
Tech Stack: React Vite + Python + Google Custom Search Engine
Live Now !

smart CV analyzer - Web Application
This application can check whether your CV is appropriate for the industry that you're willing to join and even offers you a score for the CV and recommends skills to add up as well.
Tech Stack: React + Python

Property management system
For Streamlined property management where you can add or remove your properties in the list and manage them.
Tech Stack: Mongo DB, Express JS, React JS, Node JS
